This is the fifth office action for application number 10/601,110, Metal Tube Support Bracket, filed on June 23, 2003.

#### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

On page 1, the title has been changed from "A METAL TUBE SUPPORT BRACKET AND METHOD FOR SUPPORTING A METAL TUBE" to --A METAL TUBE SUPPORT BRACKET--.

#### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: in regards to independent claim 1, the limitations of a tube support bracket having an aperture and an annular, castellated collar abutting the aperture, the collar formed having a plurality of spaced-apart tabs for swaging against the metal tube to generate a hoop stress and bite, and wherein an inner surface of each of the collar tabs is formed having at least one axial groove formed therein for receiving exterior regions of the tube when the collar is swaged tightly against the tube and in combination with the other elements recited in the claim, which is not found in the prior art of record; in regards to independent claim 7, the limitations of a tube support bracket having a circular aperture and an annular, castellated collar abutting the aperture, a plurality of spaced-apart, axial tabs sized for swaging against a metal tube to generate a hoop stress and bite the tube, and wherein

the collar is formed in a draw-punched region of the support bracket and in combination with the other elements recited in the claim, which is not found in the prior art of record; in regards to independent claim 9, the limitations of a tube support bracket having an annular, castellated collar abutting the aperture, the collar formed of tabs sized for swaging to generate a hoop stress and bite a tube, and the inner surface of the collar tabs being formed having at least one axial groove therein, and in combination with the other elements recited in the claim, which is not found in the prior art of record; in regards to independent claim 20, the limitations of a combination of a metal tube and metal tube support bracket having a aperture, and an annular, castellated collar abutting the aperture, the metal tube being swaged and bite by the collar, the collar having a tabs with inner surfaces having at least one axial groove formed therein, and in combination with the other elements recited in the claim, which is not found in the prior art of record; and in regards to independent claim 27, the limitations of a structure of a metal tube and a metal tube support bracket, the bracket having a circular aperture and an annular, castellated collar abutting the aperture, the collar being swaged against the metal tube and biting the metal tube, the collar having tabs which produce hoop stress against the tube, and in combination with the other elements recited in the claim, which is not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The examiner's amendment was made because the title of the invention is not descriptive and thus, a new title was required is clearly indicative of the invention to which the claims are directed.
